

Contestable Connection Offer Request

Did you know that distribution connection applications of 5MW or 5MVA and greater are open to competition?

This means that you can consider the use of an Independent Connection provider (ICP) to carry out the 'contestable' elements of your connection. Some of the works required for your connection must be carried out by NIE Networks in all instances. These are known as 'non-contestable' works.

If you are interested in using an ICP to carry out your connection works, then not only can you get a connection offer from NIE Networks for us to carry out all the works, but you can request an additional 'contestable connection offer' from NIE Networks free of charge.

Please sign and return this form if you wish to receive a 'contestable connection offer' from NIE Networks. This must be requested no later than 10 days of receiving your initial connection offer. NIE Networks shall endeavour to issue a contestable connection offer within 25 days of receiving this request form.

For more information on contestability visit nienetworks.co.uk/connections
