

Environmental Statement

Northern Ireland Electricity Networks (NIE Networks) will endeavour to act in an environmentally responsible manner at all times and ensure our core values and beliefs are upheld with respect to environmental performance. We will utilise industry best practice to achieve compliance and commercial benefit in all our activities through regular monitoring and measurement of our activities.

We will aim to:

- maintain legislative and regulatory compliance
- consult as appropriate with all relevant agencies
- consult relevant stakeholders to develop and refine our environmental management system
- continually improve our ISO 14001 system, striving to exceed objectives and targets where possible
- mitigate the impact of our activities on the environment

- encourage and train all employees in environmental matters as necessary
- promote the efficient use of energy and resources
- control waste management and recycling to reduce our burden on landfill and maximise the re-use of materials
- minimise the impact of our transport fleet on the environment
- commit, where possible, to environmentally sustainable procurement principles, encouraging this throughout our supply chain
- promote and facilitate the emergence of renewable energies and their integration to the network.
